## Approved For Release 2000017: CIA-RDP61S00527A000100010136-6

14 April 1955

TO : Chief, St/I/R.

Thru : Chief, D/S.

FROM : Chief, S/COM.

SUBJECT: Requirement.

## Beekground

While in Copenhagen recently, the Recordic Attache in the American Embassy there informed the writer that over the years (1951-55) he had forwarded to the Department of State a considerable amount of literature, graphs, and maps on the Great Morthern Telegraph Company, a private Danish company with headquarters at Copenhagen, which operates a telegraph system around northern Europe and a wireline telegraph facility from Helsinki, Finland, to Magneaki, Japan, via Moscow, the TransSiberian Rail-road, and Vladivostok.

None of these materials reached this office, probably because, on the surface, the materials were considered to concern Denmark, a Hon-Bloc country.

It is not known whether these materials would repose in OIR or some other segment in the Department of State.

## Requirement

- 1. Copies of all materials on or concerning the Great Northern Tele-graph Company of Comenhagen, Denmark.
- 2. A list of those materials for which copies are not or could not be made readily available.
- 3. As an alternative to (2), request opportunity to research this material in the Department of State, assuming it is all accumulated in one place.
